

From hands-on manufacturing experience,
We build our business to last 100 years
into the future

The Manufacturing Site Is a Value Center

We will build up a Kaneka’s unique manufacturing site by fusing the creativity of technology and innovation with digital technology.
With a manufacturing-first approach based on the concept of a safe and reliable plant, we will focus on maximizing and monetizing our business.

Integration of Manufacturing and “R2B+P”

By strengthening our R2B+P initiative, which strongly integrates R2B and manufacturing, and scaling up our creativity as part of our routine, we will quickly and competitively implement new technologies.

Realizing a Plant that Creates New Value and Embodies Sustainability

We will speed up our efforts in digital transformation, incorporating cutting-edge technology to evolve our production plants, and increase the speed and scale of our commercialization of new products.
To achieve carbon neutrality, we are tackling the challenge of company-wide efforts and advancing each theme ahead of schedule.
With our energy solution technology, we will also contribute to decarbonizing society, starting with local governments.
