※The range of price revision depends on the blending ratio of ingredients.

※Our sales representative will contact you regarding specific products and quotation.

The costs related to the production and sales of our processed oil and fat products, etc., including labor costs, equipment-related expenses, logistics, and packaging material have been rising and placing downward pressure on earnings.

While we have made substantial efforts to improve profitability through cost reductions, these measures alone are no longer sufficient. As a result, we have determined that a price adjustment is necessary to ensure a stable supply going forward.
